

Bi-struct[®] Alloy Steel Shredder Hammer

Material discription

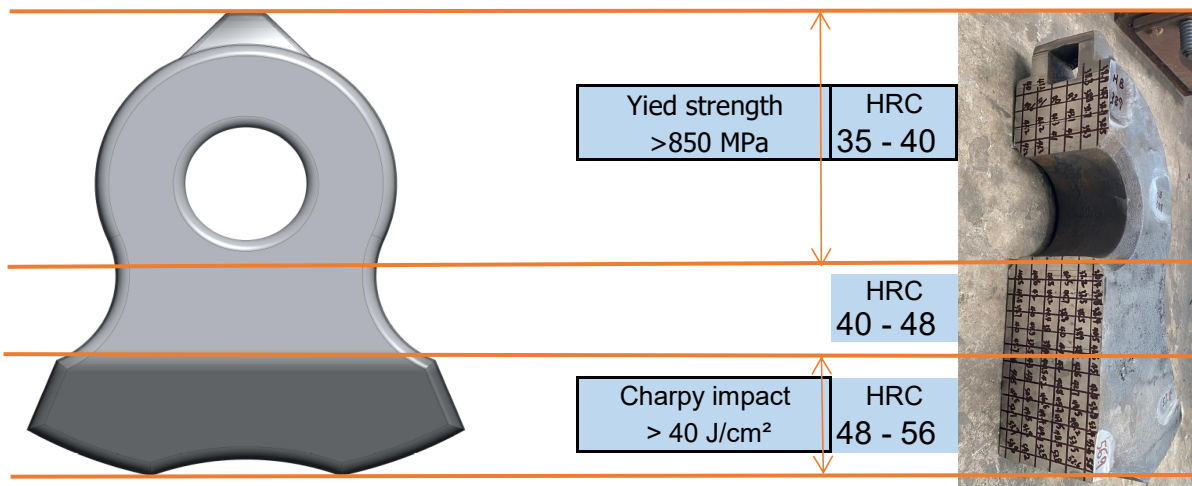

Zanco Bi-struct alloy steel is one kind of martensitic steel but using revolutionary heattreatment getting harder key area and keep high strength of installing area. Bi-struct help increase service by 2 times longer than normal manganese steel products .

Main chemical composition

Element	C	Mn	Si	Cr	Ni	Mo	S	P	Fe
Content wt%	0.4-0.7	0.4-0.8	1.0-1.6	0.8-1.6	1.0-1.6	0.4-0.9	<0.015	<0.025	Base

Bi-struct shredder hammer

Harder head for longer service life
Stronger bore surport long service

Wear Management Solution
